PRASIM THAPA

Enthusiastic and invested to advance as a Frontend Developer where I can contribute versatility to handling frontend tasks. Dedicated in leveraging own technical skills and creativity to become a proficient developer. Designing and developing application with attractive UI. Optimistic to work collaboratively in teams to complete projects before deadline.

Projects Accomplished

Book Website

- Created static Website
- Used HTML, CSS and JavaScript for frontend
- E-commerce website for Books, Novel.

Bill Management System

- Bill management system for a clothing store.
- Used Python as programming language and its libraries.
- Prints a bill after the completion of the transaction.

IOT: Group Project on Smart car Parking

- Used Arduino IDE for programming and related library
- The project uses ultrasonic sensors for detection of incoming and outgoing cars displaying the slots available for parking.

Instrument Management System

- Developed Backend and Frontend using Java
- The program keeps track of the transaction record and the data stored can be managed by client with the help of GUI.
